

Clock

Problem

Using scans of old photos, or some interesting found objects, create a new face for a store bought clock. A variety of cheap clocks can be purchased at Target, Wal-Mart, Office Max, etc. Please purchase a simple round clock between 8" and 12" that looks like it can easily be dismantled. Keep the receipt just in case. I will have tools.

For subject matter dig around in your attic, basement, yard, or garage looking for old photos of vacations, parents, grandparents, cities or interesting objects like spoons, tools, junk, or toys (they should be small enough to scan). Collect several pictures and objects so you will have a choice.

Objectives

- To create design from the old, forgotten or often overlooked
- To gain comfort with Photoshop and its tools
- To utilize and manipulate layers
- To skillfully remove the background from scans of objects
- To explore the use of blending modes, filters, adjustment layers and layer effects
- To strengthen your sense of craftsmanship and attention to detail
